

Dance Notes

It's fun to enact our learning process. Work from the lyrics and you can offer a few ideas first to give them confidence in the creative process. Show some of your ideas on movements that might fit with those lyrics and then ask the children, "How would you show that with movement, what are your ideas?" We often take a few examples and then choose one for each line of the song/for each idea or concept.

You are also welcome to copy ideas from the video included.

Enjoy!
